Abstract Insert your abstract here. The length of the abstract is limited to 150 words.

1 Introduction

This is a sample LaTeX file for papers to be submitted to IFIP/TC6 Networking 2007. Authors are invited to submit full papers including references, figures, and tables, of up to 6 letter-size pages, double-column format, with minimum 10-point font, 2.5cm margins at the top, bottom, and on each side. While you can use this template to generate your paper for review, it is not mandatory to use the .cls and .bst files in this package as long as the above mentioned formatting instructions are followed.

2 Electronic Submission via EDAS

Papers must be submitted electronically in PDF format via EDAS. The following steps outline the submission procedure:

1. Create a personal account on EDAS (if the author does not already have one).
2. Click on the IFIP/TC6 NETWORKING 2007 paper registration link. Provide the paper title and a short abstract (maximum 150 words).
3. Select the topics for the submitted paper. At least two topics must be selected for each paper. The first topic must be one of the first three topics listed (AD HOC / SENSOR NETWORKS; WIRELESS NETWORKS; or NEXT GENERATION INTERNET), wchich indicates the paper track. Additional topics (at least one, please select as many as needed to best categorize your paper) that best describe the submitted paper should be selected from the rest of the list.
4. Be certain to provide information for all authors including affiliation and country when you register the manuscript. Otherwise, the author listing will be incomplete in all web and print listings of the technical program.
5. Upload the paper. The only acceptable submission format is PDF. No more than 6 letter-size pages are allowed for review. Papers with more than 6 pages will be immediately rejected without a review.

3 Additional Notes

Networking 2007 is the sixth event in a series of International Conferences on Networking, sponsored by the IFIP Technical Committee on Communication Systems (TC6). The main objectives of Networking 2007 are to bring together active and proficient members of the networking community, from both academia and industry, to discuss recent advances in this broad and fast-evolving field of telecommunications, and to highlight key-issues, identify trends and refresh vision in the field of telecommunications.

The conference objectives will be pursued through technical sessions, keynote talks, and tutorials offered by invited experts, as well as panel discussions on hot topics. The technical sessions will be structured into three tracks. Authors are encouraged to submit full papers describing original, previously unpublished, complete research, not currently under review by another conference or journal, addressing state-of-the-art research and development in all areas of computer networking.

4 Subsequent Sections

Citation of papers is done the same way as with other LaTeX templates [1].
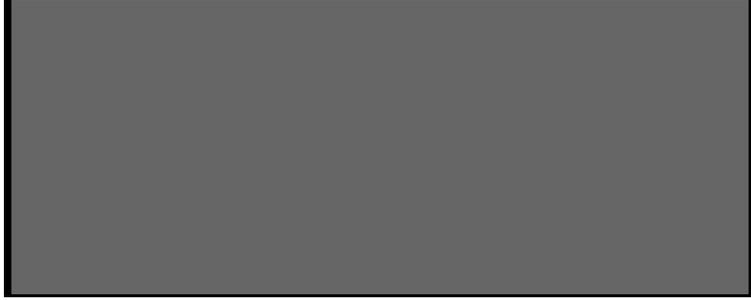

Table 1 Please write your table caption here

first	second	third
number	number	number
number	number	number

4.1 Subsections

Insert subsections as required. Do not forget to give each section and subsection a unique label (see Sect. 4).

References

1. Author: Title, Journal/Conference **Volume,** (year) page numbers.
