

Mark Prior
Director, Research and Education Networking, Asia Pacific
Juniper Networks, Inc

Mark is the Asia Pacific Research and Education Networking Director for Juniper Networks. In this role, he spearheads Juniper's relationship with research and educational organizations as well as customers and partners of Juniper.

Before joining Juniper, Mark was with AARNet where he helped design and implement the third generation of the AARNet network (AARNet3). AARNet3 was designed to be a dual stack network that could provide a native IPv6 connection to any AARNet customer. AARNet has a number of international IPv6 peering relationships with both research and education network and commercial ISPs and receives IPv6 transit from NTT America.

Before AARNet, Mark was with connect.com.au, one of Australia's first commercial ISPs, as Network Architect (Backbone Engineering).

Mark is a graduate of the University of Adelaide.
